Directions – Create a "Town" web site based on the following guidelines:

1. **Create a TOWN Folder** in your M Drive. All "Town" files will be stored here.

2. **Create the Home Page** – Create **index.html** and save to your TOWN folder.

   Include an introductory paragraph / description of the town/area. What are the highlights of the town/area? What is the town known for? What size is the town? Population?
   (Any other information)

   You might include Interesting facts / trivia about the town/area.

   Include a google map of your area using <iframe>. To do this:
   1. From Google Maps, Enter your address in the search box and press Enter.
   2. Click the link icon in the upper left panel.
   3. Select the *Share or embed map* option.
   4. Embed a map and Copy HTML.
   5. Paste into your file.

   Create a link to the attractions.html page.
   Create a second link to an external page that gives more town information.

3. **Create the Attractions Page** – Create **attractions.html** and save to your TOWN folder.

   Identify 4 Places to visit – Attractions – Include a heading, a picture and description of each.
   Also, include a related link for each attraction.
   Create a link back to the index.html page.

   General Guidelines for each Page:

   - Include all required Elements – Remember to get both pages validated.
   - Include a style sheet – for the headings, other text, links, etc.
   - Include appropriate Headings to break the page up.
   - Include a list (bulleted/numbered) or table.
   - Include internal and external links.
   - Pay attention to color contrast, font characteristics.
